

1. Close the app completely if it is currently open.
2. Update the app from the Play Store if it is not the latest.
3. Reopen the app.
4. Make a new account or sign in to an already existing account that was created through the Battery Tender® app.
5. If the Monitor is plugged in, please cycle power.
6. Go to the connect page and tap “Add A Battery Tender®”
7. Connect to the Monitor.
 - a. Tap the Search Device bar and a list of Wi-Fi networks will populate.

- b.
- c. Tap the name of your Wireless Battery Monitor (a default name will start with BM_ and then have a mix of letters and numbers).

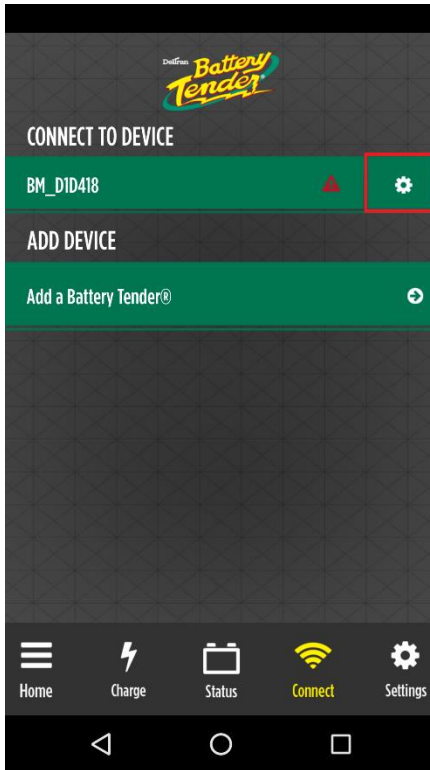

- d.
 - e. The password field will be grayed out for the first 3 minutes of plugging the Wireless Battery Monitor into the cable harness that is connected to a battery. (If the password field is grayed out, you can still tap continue to connect.)
 - f. After the first 3 minutes the last password saved will be used (The default password is “12345678” without quotation marks).
8. If you get the “Battery Tender Not Connected” message, please enable Airplane Mode and keep Wi-Fi turned on. Please repeat step 7 to try again.
 9. You will see a “Congratulations” screen, now press continue
 10. You should see a screen like this but with the default name of your Wireless Battery Monitor:

The red triangle indicates that you are connected directly to the Wireless Battery Monitor.

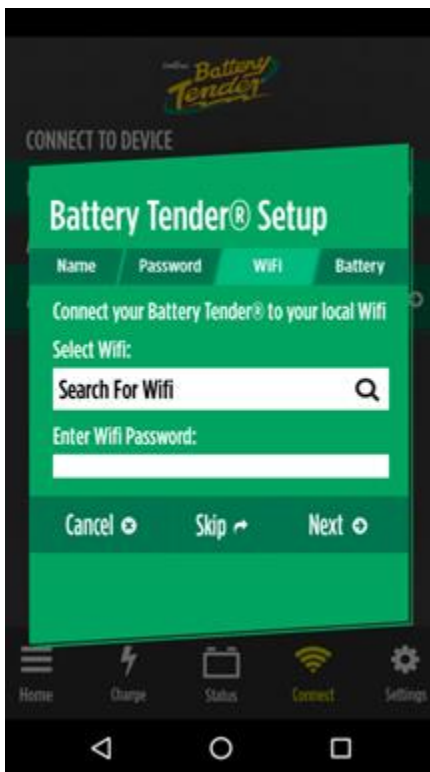

11. Click the gear icon in the picture to setup the Monitor and connect it to a Wi-Fi network.

12. Make sure that the LED Wi-Fi symbol is flashing quickly on the Wireless Battery Monitor.

a. If the LED is not flashing quickly, tap cancel and repeat steps 10 and 11.

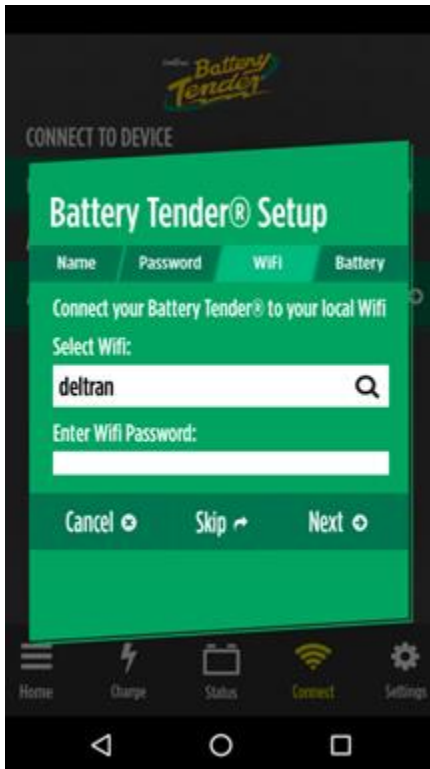

13. Setup while following the onscreen instructions but when you get to the Wi-Fi Setup page like below, you will see a "Search for WiFi" field.

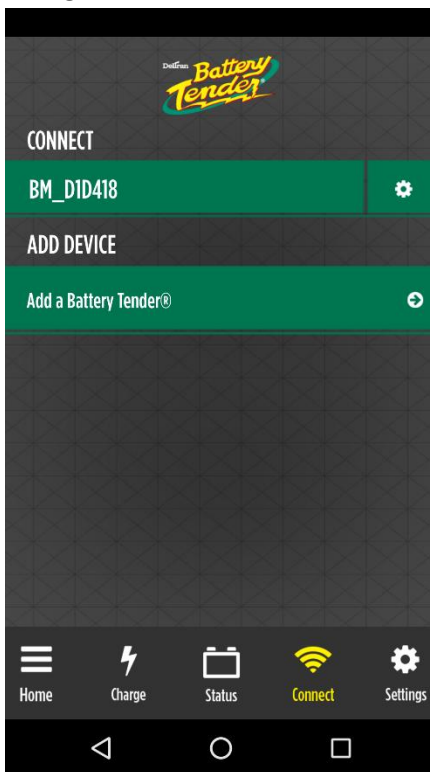

14. Tap the bar "Search For WiFi"

a. Wait for the list to populate with the Wi-Fi network that you want the Wireless Battery Monitor to connect to.

- b. The Wireless Battery Monitor can **ONLY connect to a 2.4GHz network**. Even if you see a 5GHz network in the list, the Wireless Battery Monitor will **NOT** connect to it.
 - c. Once you see your preferred network, tap it.
15. Once your preferred 2.4GHz network is selected, it will replace the “Search For WiFi” text.

16. Enter the password to your Wi-Fi network and hit next.
17. The red triangle should now not be visible.

This indicates that the Wireless Battery Monitor is connected to the previously selected 2.4GHz network.
